

New Intern Task — Web Track

Deadline: Monday, 6 July

Team Leader: Zainab Khurram

■ Web Track — Entry-Level Task

Fix small UI bugs / build a static component from a design spec

Deadline: Monday, 6 July

Scope

- Pick 2–3 small, well-defined UI bugs from the backlog (e.g., spacing/alignment issues, broken hover states, responsive layout breaks) **or** build one static component (e.g., a card, nav item, button group) from a provided design spec (Figma link or image).
- Should match the existing design system (colors, spacing, typography) already used in the project.

Deliverables

- A pull request / shared code link with the fix(es) or new component.
- Before/after screenshots (for bug fixes) or a screenshot matching the design spec (for the component).
- A short note (2–3 lines) on what was changed and why.

Acceptance Criteria

- No visual regressions on other pages/components.
- Code follows existing project conventions (naming, file structure).
- Works on both desktop and mobile viewport.

For any questions, reach out to your team leader, Zainab Khurram.
